Key Insights

The dashboard provides several important insights:

United Kingdom Dominance

The United Kingdom generates the highest sales

Product Concentration

A small number of products generate a large portion of total revenue

Year-End Increase

Sales increase toward the end of the year

High-Value Markets

Some countries have fewer orders but still generate good sales

Recommended Actions

Focus Marketing

Focus marketing on the best-selling products

Customer Retention

Improve customer retention for high-value customers

Market Expansion

Expand business in other countries with potential demand

Inventory Management

Manage inventory better for high-demand products

Implementation Strategy

01

Prioritise Top Products

Allocate marketing budget to best-selling products identified in dashboard analysis

03

Explore New Markets

Research and enter countries showing potential demand based on order patterns

02

Develop Retention Programmes

Create targeted campaigns for high-value customers using purchasing behaviour data

04

Optimise Inventory Levels

Adjust stock levels for high-demand products to prevent stockouts and overstock situations

Expected Outcomes

Increased Revenue

Higher sales through focused marketing on best-selling products

Improved Customer Loyalty

Better retention of high-value customers through targeted programmes

Market Diversification

Reduced dependence on United Kingdom market through expansion

Efficient Operations

Better inventory management reducing costs and stock issues

Final Summary

This Power BI dashboard helps analyse sales performance, customer behaviour, and product demand.

By using data analysis and visualization, businesses can make better decisions, improve marketing strategies, and increase overall sales performance.
